THE REDWOOD APPROACH

Faith woven into everyday learning

Christian values aren't treated as an add on, but form part of the relationships, culture, and daily activities of the school.

Intentional growth

Learners are encouraged to lead, serve, participate and take ownership of their personal development.

Preparing learners for life

Beyond the classroom, learners are equipped with communication skills, confidence and character that will serve them in every season of life.

A culture of belonging

We value strong relationships between families, staff and learners, creating a community where people are connected, supported and engaged.
